Fixer Flow Chart

Waste Code: 090104

Collected in 25,125,205 Litre Drums & IBC's from our customers

Transported by J&G Environmental licensed waste carrier

Unloaded at J&G stored in chemical storage area

Decanted in drum tipping area

Silver reclaimed in recovery plant

Despatched for disposal to our waste facility at Lanstar

Silver flake to silver process

Pre-treatment: Biological treatment:
This treatment is by 'bio-digestion' where 'bugs' destroy the hazardous components & convert them to an inert sludge & non-hazardous liquid. The liquid is then further processed before being returned to the relevant water course. Thus the majority of the waste 95% is actually recycled to a usable material, this provides a very environmentally friendly solution to the waste problem.
